

Other Questions

Will the results and best practices from sub-projects be compiled into a consolidated knowledge product or toolkit to support future cross-regional learning and replication?

Is there a plan to create an online collaboration or exchange platform for sub-projects working on similar risk types (e.g., heatwaves, droughts) or sectors (e.g., agriculture, water)?

Could future CLIMAAX initiatives or calls support implementation pilots that directly build on the CRA results developed during this phase?

How does CLIMAAX intend to integrate the climate risk assessment outputs into broader EU-level policy processes (e.g., the monitoring frameworks of the Mission on Adaptation)? What role is foreseen for sub-projects in contributing to these processes?

Is there a specific folder for Turkey in the downloaded global datasets, or can we directly use the download files within the code for our work? Should all download links be clipped according to the working region in Turkey?

How will the network of communities of practice created by CLIMAAX function after the end of the project, in financial and operational terms? (own resources, new funding, etc.)

How does CLIMAAX fit in with other European policies and initiatives related to climate change and risk management?

What other benefits could result from the implementation of CLIMAAX, beyond the programme's objectives?

Would it be possible to provide the guidance, how to enrich existing workflows with new data content and functional possibilities?

Could it be possible to extend the workflows with the location of hot spots areas requiring stronger attention and interventions?

Are there some plans, how to ensure minimum meaningful comparability of the climate risk assessment outcomes between the regions and evaluate the big EU picture?

Could it be possible to open discussion about some appropriate actions to be initiated as from European commission, CLIMAAX project as well as from the cascading projects side in order to ensure sustainability and further development of the CLIMAAX project outcomes?

Are the financial envelopes set out in the application form fungible between the various expenditure items? Is it possible to reallocate credits within the initial overall budget (e.g. salaries and services)? - What steps must be taken, i.e. authorisation or prior agreement from the Consortium?
